Etta Projects: Transcending limitations.

A non-profit serving the poorest of the poor in Bolivia, the organization had revitalized its mission and was ready to go above and beyond. But its brand and website were mired in the past.

Etta Projects, thanks to its strong leadership and grass roots support, had surpassed its old brand by leaps and bounds. By aligning the visual and written brand with the power of their actions, Kite created a platform that embraces their higher level of impact to create more awareness, donations and partnerships.
